PROBLEM STATEMENT

To have a one stop destination portal for providing trainings to the students where learning materials can be uploaded in an advanced and organized manner.

- Forum for Q&A categorical divided on basis of standards
- Track progress of an individual and design the report for evaluation
- Section to upload curriculum, class activities, home assignment

OUR SOLUTION AND APPROACH

- Teachers can **create quizzes**, **view responses** and **stats** .
- Students can **attempt quizzes** and view their **progress**.
- **A Google translator** that will help rural/regional people change language according to their ease.
- A dedicated **Time-Table** for **online classes** that will directly take user to online class.
- An **open resource** for education purpose which will contain **study material**.
- Students can **submit** their **Assignment** and **Homework** by **uploading** respective files on portal.
